Skills Profile

Interpersonal

- Good communication skills developed through training Robotics club members during orientation
- Exceptional leadership skills advanced through team coordination in a scrum environment
- Remarkable ability to prioritize time sensitive tasks, allowing consistent workload throughout the course of the Software Development course project
- Outstanding ability to work in both single and team-oriented environments

Technical and Academic

- Proficient in Python, Java, JavaScript, HTML5, CSS, C, C#, GDScript, and Verilog
- Flourished in a team environment demonstrating scrum methodologies in a group of 5 over the course of the Software Development course project
- Intensive research capabilities developed through incorporating various frameworks such as Bootstrap and JQuery into personal web application projects
- Well versed in the Software Development Life Cycle and the various stages of testing

Education

University of Toronto   2016-present

Honours Bachelors of Science

- Specialist in Computer Science 2nd year
- University of Toronto Scholar
- 3.50 CGPA

Relevant Projects

Nested JavaScript Project   June 2017

- Launched a web application highlighting thorough understanding of HTML, JS and CSS through effective scripts to procedurally generate additional elements
- Demonstrated in depth knowledge of object oriented data structures through its design, allowing easy maintenance and upscaling
- Displayed proficient knowledge of the Model-View-Controller software architecture

Virtual Piano Java Project   February 2017

- Created a simple multiclass Java application which displays which key is pressed, and plays a note on the piano when certain keys are pressed
- Displayed a fair understanding of programming in Java as well as several Java libraries
- Practiced test-driven development through writing tests in JUnit throughout the course of the project executing unit, integration, regression and acceptance tests with each additional feature

Experience

Sales Associate   September 2015 - May 2016

Dollarama

- Excelled in customer-oriented positions, providing top notch customer service attracting new and repeating customers

Server   October 2013 – August 2014

McDonald's

- Handled 50+ orders per shift completing each with precision within reasonable time
- Mastered point-of-service (POS) computer system for automated order taking

Extracurricular activities

Robotics club senior leader   September 2012 – June 2016

- Trained junior teams, teaching basic design, autonomous algorithms in C and team coordination
- Promoted club activities as well as organizing special club related events and fund raisers
- Gathered sponsorships from local businesses to raise funds for club activities
